Homework 3 Inviscid Flow over a Bump Due Monday 11 2-2002 The task is to compute the flow field by solving the inviscid compressible Euler equations on the upper half of a 4 2 thick circular arc bump on a wall over the transonic speed range  $M = 0.5$  to  $0.85$  and  $1.65$ . The results for the  $M = 0.85$  case should be compared at least qualitatively to literature results reproduced in the handout 3 pages from Rizzi and...
