[THE ACTIVE JOURNAL OF COMPUTATIONAL ALGEBRA:](#)

A Proposal Carlo Traverso 1 The problem In the numerical computational domain, the basic software tools (Fortran, C, numerical libraries) are well established, and journals (electronic or not) exist that collect original software contributions. Moreover, the distinction between pure research in mathematical analysis and numerical analysis is well established, in two distinct scientific domains. In alg...

ON USING GENERICS FOR IMPLEMENTING ALGEBRAIC STRUCTURES VIRGINIA NICULESCU Abstract. Object oriented programming and design patterns form a very good framework for implementing a computational algebra system. Object oriented programming offers different kinds of mechanisms for obtaining high level of genericity; and these are also mechanisms for reusing. The need to represent and work with abstract...
